In the Description:

Page 8, lines 4 to 10, change "Referring to Fig. 5...one liner 48." to

-- Referring to Fig. 5, a layer of adhesive 47 is applied to the back side of one or both of the removable sections 44, 45 and a removable liner 48 of conventional type is disposed over the layer or layers of adhesive 47. As shown, the removable liner 48 is of smaller height and width than the sheet of paper 11. Where the adhesive layer 47 is applied to only one of the removable sections 44, 45, the liner 48 would be sized only to fit over that layer of adhesive. Alternatively, adhesive spots may be used to secure the removable sections in place. Also, two separate liners may be used instead of the one liner 48.
